Fazal Abbas

Frontend Developer — React, JavaScript & Firebase

SUMMARY

Software engineering student focused on frontend development with React, JavaScript, and Firebase. I build responsive, production-ready web apps — my strongest project is a point-of-sale and inventory system built for a real retail business, and I've also shipped a clinic management system, a school management platform, and business tools like invoicing and quoting apps. Actively growing into full-stack work with Node.js, Express, and MongoDB, with a focus on clean code, practical UI, and shipping working software on time.

SKILLS

FRONTEND

React · JavaScript (ES6+) · HTML5 · CSS3 · Tailwind CSS · Bootstrap · jQuery

BACKEND & DATA

Node.js · Express · Firebase · MongoDB · MySQL · PostgreSQL · REST APIs

AI

Prompt Engineering · Generative AI · Responsible AI

EXPERIENCE

Jun – Jul 2026
Karachi, PK

NexSoft Solutions

Frontend Development Intern

One-month, project-based virtual internship. Built real-time features with Socket.io and Firebase Firestore, a JWT-authenticated task manager with Kanban boards, a notes app, a full ecommerce app with cart and checkout, and a MERN blog with JWT auth.

Jun – Jul 2026
Karachi, PK

Hex Softwares Pvt. Ltd.

Web Development Intern

One-month, project-based virtual internship. Built a Node/Express/MongoDB crowdfunding platform with JWT authentication, among other web projects.

Jun – Jul 2026
Karachi, PK

CodeAlpha

Frontend Development Intern

One-month, project-based virtual internship focused on frontend build tasks and UI components.

Jun – Jul 2026
Karachi, PK

DecodeLabs

Frontend Development Intern

One-month, project-based virtual internship covering responsive web layout and interactive web element implementation.

PROJECTS

Personal

Point-of-Sale & Inventory System

Order tracking, stock management, and sales reporting built for a real retail business.

Stack — React · Firebase

Personal

ClinicOS — Clinic Management System

Patient records, appointments, doctor/receptionist roles, and billing, with role-based access and real-time data.

Stack — React · Firebase

Personal

EduLedger — School Management System

Full-stack school management platform: a 17-table normalized schema, server-side role-based access control, and a deployed MySQL backend.

Stack — React · Vite · Tailwind · TanStack Query · Node/Express · MySQL

Personal

QuoteForge — Quotation & Invoicing Platform

Quotation and invoicing tool for small businesses, with a serverless backend and hosted database.

Stack — React · Vercel Functions · PostgreSQL

Personal

CivicConnect — Civic Issue Reporting Platform

Civic issue reporting platform for Pakistan supporting English, Roman Urdu, and Urdu, generating structured complaints from citizen reports.

Stack — React

EDUCATION

In progress

Advanced Diploma in Software Engineering (ADSE) — Aptech

Career program in full-stack web development, enterprise applications, and modern software engineering.

CERTIFICATIONS

Oct 2026 – Nov 2028

Digital Marketing Certified

HubSpot Academy — credential ID ecd90a6a6e7c4afe9596c38abe3531ab.

In progress

Google AI Essentials

Google / Coursera — five-course program covering AI fundamentals, prompting, productivity with AI tools, and responsible AI use.

In progress

Introduction to Front-End Development

Meta / Coursera — first course of the Meta Front-End Developer Professional Certificate: HTML, CSS layout, the DOM, and web accessibility.

References and additional project details available on request.
